Subject: EZ Sweep

To whom it may concern:

We have been using EZ Sweep for our clean up needs for over 2 years. Our company is involved with every type of roadway project from milling and resurfacing of major highways to construction and maintenance of the smallest commercial and residential sites. We have owned numerous street sweepers, vac trucks and mechanical brooms.

On the milling projects it is essential that the milled surface is cleaned and dried quickly prior to the application of the asphalt overlay. In commercial and residential overlays we lightly cover the new pavement with sand to prevent scuffing of the new pavement.

When resurfacing residential and commercial developments we need to cover driveways and brick pavers with sand prior to the overlay to prevent tracking of the tack coat. EZ Sweep is our choice for the company that provides us with the best, most efficient method of clean up.

Teresa Nichols runs the company extremely well. They are able to meet our schedules; they are able to provide courteous, knowledgeable employees and reliable equipment.

If you have any questions concerning this matter, please do not hesitate to contact this office.

Respectfully Submitted,
BETTER ROADS INC.

Joseph M. Restino
Vice President
